Would you like to do leading-edge research while working in world-class companies specializing in computer games, computer animation, visual effects or film post-production? The Universities of Bath and Bournemouth have come together to form a new Centre which will pay you to do just that!

The Centre has over £6 million to invest in **50 doctoral studentships**. We are recruiting now and you can start as soon as October 2009 or any time after. Funding is from the UK's Engineering and Physical Sciences Research Council. We are the only national Centre offering the package in this industry sector.

You will get £14,500 a year for four years; all university fees paid; a personal laptop with support software; one year training at either or both universities; three years in a company at the leading edge; fully-paid travel to international conferences such as ACM SIGGRAPH and Eurographics. All that and a doctorate at the end of it!

Interested? Contact us now, at cde@cs.bath.ac.uk

The Centre also has conventional PhD studentships available at Bath:

University of Bath

Media Technology Research Centre
Department of Computer Science

- **3 PhD studentships**

Available for three years from
October 1st 2009.
